

*Dear Colleagues,*

*On behalf of Christiana Care Quality Partners (CCQP) I'm pleased to let you know that Dr. Dan Elliott has become our Medical Director as of March 1<sup>st</sup>.*

*Many of you know Dan from his training at Christiana Care and from his role as Associate Chair of the Department of Medicine. Dan is a Medicine-Pediatrics physician, still active in direct inpatient and outpatient care, as well as in precepting. In addition to his clinical background Dan was a Fellow in the Generalist Scholars Program at the University of Pennsylvania, where he earned a Masters in Clinical Epidemiology with a concentration in Outcomes Research. Dan has served in several roles in the Department of Medicine, most recently as Associate Chair for Research. In this role he has focused on using data to measure and improve the quality of care. Dan has also been a Value Institute Scholar, and also continues to serve as a leader in "Bridging the Divides." This is a Medicare innovation project combining analytics and care management to improve care for patients with coronary artery disease.*

*As part of the CCQP leadership Dan will work with our Executive Director, Doug Azar, and with myself (as the Chief Executive Officer) to continue our journey toward the Triple Aim of enhanced outcomes, the best experience of care, and the control of healthcare cost. He will also have prime responsibility for data analytics and reporting, and for working with practicing clinicians toward successful partnerships with CCQP.*

*Dan will be more and more involved between now and March. He will also be continuing some of his clinical and research activities as CCQP grows.*

*Thank you to all who have helped CCQP become established, who've helped in the process of choosing Dan as the Medical Director, and who are committed to having the best healthcare and health outcomes for our community.*

*Thanks,*

*Alan Greenglass, M.D.  
Chief Executive Officer  
Christiana Care Quality Partners*
